Health Conditions

Your spine is the foundation of health and core strength in your body. Shifts in the vertebrae or sections of the spine will spread ultimately causing weakness and distortion to ALL the areas of the spine. These distortions are reflected in abnormal posture. Research shows abnormal posture leads to chronic pain, disease and possibly a shortened life span.¹ Please answer the following questions accurately so we may determine the full extent of your condition.

Misalignment of the individual vertebrae or distortion of the complete cervical curve (neck) originating in the neck or a compensation from postural distortions in other areas of the spine may result in many health conditions. Have you experienced any of these symptoms presently or in the past?

Please indicate (N) = Now, (P) = Past next to all conditions you've experienced or both if applicable.
